EDUCATION

- B.Tech, Computer Science & Engineering
  Institute of Engineering & Technology
  2022 — 2026

CORE STACK

- TypeScript · Python
- React · Next.js · FastAPI
- LLMs · RAG · PyTorch
- PostgreSQL · Docker · Git

CURRENTLY

- Building Nexis — an AI knowledge workspace
- Exploring agentic AI & WebGL interfaces

Pragun Gupta

"Turning ideas into meaningful digital experiences."

Open to 2026 opportunities Full-stack · Applied AI Remote & on-site

PROFILE

Final-year computer science student and developer building at the intersection of full-stack engineering, applied artificial intelligence and thoughtful interface design. Comfortable across the stack — React and TypeScript on the front, Python and FastAPI behind it, relational and vector data underneath. I care about accessible components, honest performance budgets and products that stay useful after the novelty wears off.

SELECTED PROJECTS

Nexis — AI knowledge workspace

2025

NEXT.JS · TYPESCRIPT · FASTAPI · LANGCHAIN · PGVECTOR

- End-to-end RAG workspace turning dense PDFs and research notes into cited, conversational answers.
- Hybrid vector + keyword retrieval pipeline with citation traceability and streaming multi-document synthesis.

Pulse — Training analytics dashboard

2025

REACT · TYPESCRIPT · FASTAPI · POSTGRESQL · RECHARTS

- Legible analytics surface turning messy workout logs into recovery, consistency and load signals.

Campusly — Student community platform

2024

REACT NATIVE · EXPO · NODE.JS · EXPRESS · MONGODB

- Verified campus spaces, lost-and-found, event discovery and real-time chat in one mobile experience.

EmotiScan — Responsible emotion classifier

2024

PYTHON · PYTORCH · OPENCV · GRAD-CAM · FASTAPI

- Real-time expression inference at 84% held-out accuracy with Grad-CAM explanations and ethics notes.

CERTIFICATIONS

MACHINE LEARNING SPECIALIZATION — DEEPLEARNING.AI

GENERATIVE AI WITH LLMS — AWS

FULL-STACK WEB DEVELOPMENT — META

APPLIED DATA ANALYTICS — GOOGLE
